

We feel that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law protections has improved our time at home by not allowing nuisance calls to disrupt our lives. We were receiving fifteen to twenty calls a week before Indiana's Telephone Privacy law protection and now only receive one to two. That is very important to a person that is disabled and ill not to be disturbed by nuisance calls at all hours. The law has been a real life saver to us.
